Hidden Digital Skills: Training Resource Guide

A resource guide to New York City's youth and adult digital skills training programs. These programs are helping New Yorkers build digital literacy, develop advanced technical skills, and keep pace with a rapidly changing labor market.

by Rachel Neches, Yona Litwin, and Eli Dvorkin

Hidden Digital Skills: Training Resource Guide is a resource highlighting programs across New York City that provide digital skills training to New Yorkers. The guide features 29 youth programs and 43 adult programs, offering training that ranges from foundational digital literacy to more advanced technical skill building. Together, these programs provide a snapshot of New York City's existing digital skills training landscape and the resources available to help New Yorkers keep pace with a rapidly changing labor market. Read the full report here: *The Hidden Digital Skills Reshaping New York City's Labor Market*

Youth Programs: Full List?

1. America on Tech: Tech Flex Leaders/TECH360
2. The Animation Project
3. Beam Center
4. BioBus: Mobile Lab
5. Bridge to Enter Advanced Mathematics (BEAM)
6. Brooklyn STEAM Center

7. City Parks Foundation: CityParks Learn
8. Cooper Union: STEM Saturdays
9. Genesys Works
10. Genspace Biorocket Research Internship
11. Girls Who Code: Pathways
12. Hearst High School Media Internship
13. High School Initiative in Remote Sensing of the Earth Systems Science & Engineering (HIRES)
14. HYPOTHEkids: Hk Maker Lab
15. iMentor
16. The Knowledge House: Teen Tech Launchpad (TTL)
17. Mouse AI League Programs
18. New York Academy of Sciences: Scientist-in-Residence
19. New York Hall of Science: Science Career Ladder Explainers Program
20. The New York Historical: Tech Scholars
21. NYC FIRST STEM Centers and Robotics Programs
22. NYU Tandon Center for K12 STEM Education
23. Pathways in Technology Early College High School (P-TECH)
24. RISE (Rockaway Initiative for Sustainability and Equity): Environmentor
25. Rocking the Boat
26. STEM From Dance
27. STEM Kids NYC
28. Verizon Innovative Learning Schools (VILS)
29. Youth Design Center

Adult Programs: Full List

1. AARP: Senior Planet
2. ACE Program for the Homeless: Project Comeback (PCB)
3. App Academy
4. Break Through Tech
5. Bronx Business Tech Incubator
6. Brooklyn Navy Yard: Computer Numerical Control (CNC) Machine Operator and Programmer Training
7. Brooklyn Public Library: Business & Career Services
8. Byte Academy
9. CodePath.org
10. COOP Careers
11. Cooper Union: Retraining Program for Immigrant Engineers (RPIE)
12. CUNY Tech Prep
13. CUNY Upskilling
14. FedCap: Computer Service Technician Program
15. Flatiron School
16. Fullstack Academy
17. General Assembly
18. Goodwill: Digital Career Accelerator (GDCA)
19. Grace Institute
20. KindWork Customer Experience Fellowship
21. The Knowledge House: The Innovation Fellowship
22. LaGuardia Community College Data Analytics Bootcamp
23. The Marcy Lab School

24. New York Public Library: Project <code>
25. New York Public Library: TechConnect
26. Northstar Digital Literacy
27. NPower
28. Nucamp
29. NYC Department of Small Business Services: Access Training
30. NYC Parks: Media Labs
31. NYC Tech Talent Pipeline
32. NYCHA Digital Vans
33. Opportunities for a Better Tomorrow (OBT)
34. Per Scholas
35. Pursuit
36. Queens Public Library: Technology Training
37. Queensborough Community College: Digital Green Technology Professional Training Program
38. The Recurse Center
39. Sapna NYC
40. St. Nicks Alliance: Workforce Development
41. SUNY's Advanced Technology Training and Information Networking (ATTAIN) Labs
42. Union Settlement
43. Year Up United

Youth Programs

1. America on Tech: Tech Flex Leaders/TECH360

Description: America on Tech prepared the next generation of technology leaders from underserved communities through training, mentorship, internship opportunities, and connections. Tech Flex Leaders is a nine-month program where students learn how to code and choose a specialized tech track to pursue. TECH360 is a summer program helping students develop knowledge, skills, and mindsets around a technology culminating in a final project.
Who can participate: High school students
Location: Midtown, Manhattan
Website: https://www.americaontech.org/

2. The Animation Project

Description: The Animation Project is a New York City-based nonprofit studio, providing underserved youth with professional animation training, digital arts technology, and mentorship.
Who can participate: Young adults
Location: New York City students, many of whom have been impacted by the carceral system
Website: https://www.theanimationproject.org/

3. Beam Center

Description: Beam Center empowers youth through integrating art, design, science, and engineering with hands-on, collaborative project-making. Beam Center works with schools across the city while offering youth employment programs and summer camps at their Red Hook production space.
Who can participate: Ages 8-24
Location:

Beam Center (Red Hook, Brooklyn)
Website: https://www.beamcenter.org/

4. BioBus: Mobile Lab

Description: BioBus Mobile Labs, equipped with a $75,000 microscope and staffed by scientists, park in front of schools and community centers and provide inquiry-based and hands-on lab sessions. Through the “Explore” program, Mobile Labs park at sites for eight to twelve weeks, providing students the opportunity to develop their own research practices while building site staff’s capacity to run inquiry-based research programs.
Who can participate: K-12 and college students
Location: New York City, with a focus on Harlem, the Bronx, and the Lower East Side
Website: https://www.biobus.org/programs-archive/biobus/

5. Bridge to Enter Advanced Mathematics (BEAM)

Description: BEAM’s free programs create pathways for students from low-income and historically marginalized communities to become scientists, mathematicians, engineers and computer science students.
Who can participate: Students from middle school through college
Location: New York City
Website: https://www.beammath.org/

6. Brooklyn STEAM Center

Description: Brooklyn STEAM Center provides career and technical training in tech, manufacturing, and design for Brooklyn high school juniors and seniors at the Brooklyn Navy Yard.
Who can participate: 11th-12th grade students at partner schools in Brooklyn
Location: Brooklyn Navy Yard
Website: https://brooklynsteamcenter.org/

7. City Parks Foundation: CityParks Learn

Description: CityParks Learn is the STEM-education arm of the City Parks Foundation and provides dynamic outdoor programming for young New Yorkers rooted in STEM and environmental education. CityParks Learn hosts school-day, afterschool, and summer programming as well as paid internships.
Who can participate: 2nd- to 12th grade students
Location: New York City
Website: https://cityparksfoundation.org/learn/

8. Cooper Union: STEM Saturdays

Description: In the STEM Saturdays program, students who have little to no exposure to STEM extracurricular programs can take project-based STEM courses at the Cooper Union School of Engineering on Saturdays during the academic year.
Who can participate: 9th-11th grade students
Location: The Cooper Union's School of Engineering (East Village, Manhattan)
Website: https://cooper.edu/engineering/stem/saturdays

9. Genesys Works

Description: Genesys Works provides high school students in underserved communities with a 14-month program that

combines professional and technical training with paid IT internships and college and career coaching.
Who can participate: High school students
Location: New York City
Website: https://genesysworks.org/locations/new-york/

10. Genspace Biorocket Research Internship

Description: The Biorocket Research Internship is a six-month science research internship providing students with the opportunity to learn the latest advances in genetic engineering and biology laboratory skills.
Who can participate: Public and charter high school students, ages 16 and up.
Location: Brooklyn
Website: https://www.genspace.org/biorocket

11. Girls Who Code: Pathways

Description: Pathways is a seven-week free, flexible online program for students who want to learn coding at their own pace. Coursework is offered in five tracks: data science + AI, game design, web development, cybersecurity, and AI + society. In addition to coursework, students can participate in corporate partner events, career panels, and advisor-led workshops aligned with emerging technologies.
Who can participate: 9th-12th girls and non-binary students
Location: Virtual
Website: https://girlswhocode.com/programs/pathways

12. Hearst High School Media Internship

Description: The Hearst Media Internship is a paid, 5-week internship for high school students aiming to enter the media and entertainment industry with training in media literacy and audio production, career development, and mentorship.
Who can participate: 11th and 12th grade students
Location: Paley Center for Media (Manhattan)
Website: https://www.paleycenter.org/education/interns-hs

13. High School Initiative in Remote Sensing of the Earth Systems Science & Engineering (HIRES)

Description: HIRES is a seven-week paid summer research program at the City College of New York where high school students gain research experience and attend courses in spatial analysis.
Who can participate: New York City high school students
Location: The City College of New York
Website: https://crest.cuny.edu/hires/

14. HYPOTHEkids: Hk Maker Lab

Description: HK Maker Lab is a free 5-week summer intensive in engineering, design, and entrepreneurship at Columbia University for rising juniors and seniors from backgrounds that are underrepresented in STEM.
Who can participate: 10th-11th grade students attending a New York City public or charter school who can demonstrate educational and/or economic disadvantage
Location: Columbia University (Morningside Heights, Manhattan)
Website: https://www.hypothekids.org/hkmakerlab

15. iMentor

Description: iMentor matches 11th and 12th grade students with a committed mentor for two years. These mentors offer guidance as they pursue college access and career success.
Who can participate: 11th-12th grade students
Location: New York City
Website: https://imentor.org/

16. The Knowledge House: Teen Tech Launchpad (TTL)

Description: Teen Tech Launchpad is a free six-week summer tech intensive for high school youth. Students explore core tech and digital skills through hands-on learning, build confidence using industry tools, and get support preparing for what's next, whether that's internships, work-based learning opportunities, or continued education.
Who can participate: 10th-12th grade students living in the New York City Metro Area
Location: Bronx
Website: https://www.theknowledgehouse.org/teen_tech_launchpad/

17. Mouse AI League Programs

Description: The AI League Competition is a year-long, 60-hour course in which middle and high school students learn how computing and AI work, practice human-centered design and market research, and build and pitch an app prototype that addresses a problem in their community. Volunteer tech professionals mentor students across the school year, and each school's top team competes at Emoti-Con, Mouse's citywide competition. Introduction to AI League is a semester-long program in which students build AI literacy, practice design and computational problem solving, and create a wireframe, prototype, and product pitch that address a real problem in their community. Students present their work to industry professionals at Student Presentation Day.
Who can participate: Middle and high school students at participating public schools.
Location: New York City (all five boroughs) and Newark, NJ
Website: https://mouse.org/aileague

18. New York Academy of Sciences: Scientist-in-Residence

Description: The Scientist-in-Residence Fellowship Program matches scientists with New York City public school teachers to develop and implement long-term research projects in the classroom.
Who can participate: New York City public school teachers
Location: New York City
Website: https://www.nyas.org/learning/school-community-programs/scientist-in-residence/

19. New York Hall of Science: Science Career Ladder Explainers Program

Description: The Science Career Ladder Explainers program trains New York City high school and college students to guide visitors through exhibits as well as lead hands-on activities at the New York Hall of Science.
Who can participate: High school and college students
Location: Queens
Website: https://nysci.org/become-a-nysci-explainer

20. The New York Historical: Tech Scholars

Description: The New York Historical offers public history and digital humanities programs for high school students year-round. Tech Scholars is their suite of week-long programs that center the student-led creation of projects, including podcasts, websites, temporary exhibitions, and more.
Who can participate: High school students
Location: The New York Historical (Manhattan)
Website: https://www.nyhistory.org/education/digital-humanities

21. NYC FIRST STEM Centers and Robotics Programs

Description: NYC FIRST provides meaningful and joyful STEM and robotics programming through citywide robotics competitions and operates two STEM Centers that host digital and non-digital fabrication equipment, computing and software, components, and expert staff.
Who can participate: High school students
Location: New York City
Website: https://www.nycfirst.org

22. NYU Tandon Center for K12 STEM Education

Description: NYU Tandon Center for K12 STEM Education runs summer programs delivering high-quality STEM education to middle and high school students in NYU labs. Programs feature hands-on learning opportunities, mentorship, and advanced curriculum on topics like robotics, cybersecurity, engineering, and more.
Who can participate: Middle school and high school students
Location: NYU Tandon (Brooklyn)
Website: https://k12stem.engineering.nyu.edu/

23. Pathways in Technology Early College High School (P-TECH)

Description: Pathways in Technology Early College High School (P-TECH) enables students to earn both a high school diploma and a free two-year degree from New York City College of Technology (City Tech). Work-based learning opportunities include site visits, professional mentoring, and paid internships.
Who can participate: High school students
Location: Multiple in New York City
Website: https://www.schools.nyc.gov/learning/student-journey/career-connected-learning/ptech-high-schools

24. RISE (Rockaway Initiative for Sustainability and Equity): Environmentor

Description: Environmentor is a science research mentorship program for high school students to conduct authentic research, under the mentorship of scientists from local universities and research institutions, on projects focused on the Rockaway shoreline.
Who can participate: 9th-11th grade students who attend school in or near the Rockaway peninsula.
Location: RISE (Far Rockaway, Queens)
Website: https://www.riserockaway.org/rise/programs/youth/environmentor-internship/

25. Rocking the Boat

Description: Rocking the Boat offers middle and high school students hands-on, inquiry-based activities that explore Bronx River ecosystems and ecology. Students develop STEM skills including navigating, chart reading, sample collection and

testing, scientific observation, and recording data, as well as technical skills such as sailing and boat handling.
Who can participate: Middle and high school students in the Bronx
Location: Bronx River
Website: https://rockingtheboat.org/

26. STEM From Dance

Description: STEM From Dance uses dance to spark interest in and boost confidence with STEM topics among girls through curriculum, pop ups, clubs, and camps.
Who can participate: Middle school and high school girls
Location: New York City
Website: https://stemfromdance.org/

27. STEM Kids NYC

Description: Equipped with a team of dedicated educators, engineers, and computer and systems programmers, STEM Kids NYC provides a year-round, intensive suite of STEM education programs for pre-K to 12th grade students. Among them, STEM Kids NYC offers in-school programs, hackathons, teacher professional development, summer camp, and virtual learning.
Who can participate: Pre-K to 12th grade students
Location: New York City
Website: https://stemkidsnyc.org/letter-from-our-founder/

28. Verizon Innovative Learning Schools (VILS)

Description: Verizon Innovative Learning Schools partners with schools and districts to get internet-connected devices into the hands of students and to enhance how teachers use technology in the classroom. Each school receives dedicated devices and accessories for all students and teachers, as well as access to professional learning, including a stipend toward an instructional technology coach, on-demand courses, and more.
Who can participate: Middle school and high school students
Location: New York City
Website: https://digitalpromise.org/verizon-innovative-learning-schools/

29. Youth Design Center

Description: Youth Design Center is a Brooklyn-based, youth-led creative agency and innovation hub working with underresourced youth to lower their barriers to entry to STEAM. Youth Design Center prepares young people for careers in design, technology, media, and the creative economy though hands-on learning, paid workforce experiences, and industry-connected training.
Who can participate: Teenagers and young adults up to 24; varies by program
Location: East Brooklyn
Website: https://www.youthdesigncenter.org/

Adult Programs

1. AARP: Senior Planet

Description: Created to help older adults use technology to achieve their goals, Senior Planet offers a range of free online

courses where participants sharpen their digital skills and learn about topics including health & wellness, technology, life & culture, work & money, and more.
Who can participate: Older adults
Location: Online
Website: https://seniorplanet.org/

2. ACE Program for the Homeless: Project Comeback (PCB)

Description: Project Comeback is ACE's workforce development and vocational rehabilitation program. In Project Comeback, New Yorkers who are experiencing homelessness obtain the educational, interpersonal, and technical skills they need to secure and retain full-time, permanent employment.
Who can participate: Participants are welcomed into Project Comeback from homeless shelters, substance use treatment centers, and transitional facilities located throughout New York City.
Location: New York City
Website: https://acenewyork.org/project-comeback/

3. App Academy

Description: App Academy is an intensive bootcamp school offering 16 to 24-week software engineering courses with a deferred tuition model.
Who can participate: Adults
Location: Online
Website: https://www.appacademy.io/

4. Break Through Tech

Description: Break Through Tech, an initiative of Cornell Tech, works with high potential undergraduate students from across the country to train, empower and connect them to influential tech opportunities. The programs offer fellows technical skills training, professional readiness support, and real-world project experiences to break into influential tech roles.
Who can participate: Undergraduate students
Location: New York City
Website: https://www.breakthroughtech.org/

5. Bronx Business Tech Incubator

Description: The Bronx Business Tech Incubator at Lehman College is a hub designed to support local entrepreneurs, startups, and small businesses with resources, talent, and guidance tailored to the community's needs.
Who can participate: Entrepreneurs
Location: Bronx
Website: https://www.lehman.edu/academics/continuing-professional-studies-school/bbti/

6. Brooklyn Navy Yard: Computer Numerical Control (CNC) Machine Operator and Programmer Training

Description: The Brooklyn Navy Yard's Employment Center hosts CNC Operator and CNC Programmer Training Programs. These free programs provide an in-depth, hands-on training experience for individuals who want to develop specialized skills in CNC operations.
Who can participate: Adults
Location

: Brooklyn Navy Yard
Website: https://www.brooklynnavyyard.org/training-opportunities/

7. Brooklyn Public Library: Business & Career Services

Description: Brooklyn Public Library's Business & Career Services offers a free Digital Skills and AI Literacy Program designed to help Brooklyn residents build the technical and professional skills needed for career growth, financial stability, and long-term success.
Who is serviced: Brooklyn residents
Location: Brooklyn
Website: https://www.bklynlibrary.org/business/digital-skills-and-ai-literacy

8. Byte Academy

Description: Byte Academy is an industry-focused coding school with bootcamps on full stack development and data science.
Who can participate: Adults
Location: Online
Website: https://www.byteacademy.co/

9. CodePath.org

Description: CodePath offers computer science college students a free, clear roadmap to tech careers through expert training, career guidance, and community support.
Who can participate: Computer science college students
Location: College students
Website: https://www.codepath.org/

10. COOP Careers

Description: COOP Careers connects first-generation and low-income college graduates to well-paying careers in data analytics, digital marketing, and financial services by combining technical training with peer-to-peer mentorship and networking.
Who can participate: First-generation and low-income college graduates
Location: New York City
Website: https://coopcareers.org/

11. Cooper Union: Retraining Program for Immigrant Engineers (RPIE)

Description: Retraining Program for Immigrant Engineers is a free professional development opportunity that helps immigrant, refugee, and asylee engineers and IT professionals translate their prior education and experience into jobs in the tech and engineering sectors in the US.
Who can participate: Immigrants, refugees, and asylum seekers with a background in engineering, architecture, technology, or other related fields.
Location: New York City
Website: https://cooper.edu/continuing-education/retraining-program-immigrant-engineers

12. CUNY Tech Prep

Description: CUNY Tech Prep is a yearlong technical and professional development program for CUNY computer science and related majors to learn in-demand technologies, master professional soft skills, and land great tech jobs in New York City.
Who can participate: CUNY computer science and related majors
Location: 11 CUNY colleges
Website: https://cunytechprep.org/

13. CUNY Upskilling

Description: CUNY's Upskilling initiative provides free, online training tailored to get participants the in-demand skills and knowledge that NYC's employers and high growth industries need.
Who can participate: CUNY students
Location: New York City
Website: https://www.cuny.edu/about/administration/offices/ocip/students/upskilling/

14. FedCap: Computer Service Technician Program

Description: Workforce development agency FedCap prepares students for entry-level IT jobs including help desk and tech support.
Who can participate: Adults
Location: New York City
Website: https://www.fedcap.org/computer-service-technician-program/

15. Flatiron School

Description: Combining coding bootcamps with paid apprenticeships, Flatiron School provides instruction and coaching for participants entering careers in software engineering, AI and data science, and cybersecurity. Programs are designed for total beginners, no experience needed.
Who can participate: Adults
Location: Online
Website: https://flatironschool.com/

16. Fullstack Academy

Description: Fullstack Academy helps professionals advance their careers in disciplines such as coding, cybersecurity, data analytics, product management, AI and machine learning, and cloud computing, via programs, bootcamps, and career support.
Who can participate: Adults
Location: Online
Website: https://www.fullstackacademy.com/programs/coding-bootcamp/new-york#guide_to_coding_bootcamps_in_n_y_c

17. General Assembly

Description: General Assembly is a technology bootcamp that provides hands-on training in software engineering, data science, UX design, digital marketing, and AI.
Who can participate: Adults
Location: New York City
Website: https://generalassemb.ly/

18. Goodwill: Digital Career Accelerator (GDCA)

Description: Goodwill Digital Career Accelerator offers hands-on training and industry-recognized certificates to learners at every digital skill level at no cost. Participants build job-ready tech skills in fields like IT support, project management, data analytics and cybersecurity at their own pace.
Who can participate: Adults
Location: New York City
Website: https://www.goodwill.org/how-we-work-with-you/dca/

19. Grace Institute

Description: Grace Institute offers a 14-week, tuition-free workforce training and job placement program preparing women for upwardly mobile administrative careers. The program combines standardized administrative training with customizable specialized training in industry-specific skills.
Who can participate: Women
Location: Manhattan
Website: https://graceinstitute.org/

20. KindWork Customer Experience Fellowship

Description: The Customer Experience Fellowship is a free seven-week training curriculum that emphasizes professional communication and organizational skills, in addition to job-specific platform instruction to prepare students for work in customer experience and customer success careers in the tech sector.
Who can participate: People 20-29 years old who meet a list of criteria
Location: Brooklyn
Website: https://www.kindwork.org/fellowship-details

21. The Knowledge House: The Innovation Fellowship

Description: The Innovation Fellowship is a six-month program that equips learners with the skills and support needed to break into tech. Participants gain hands-on training, industry exposure, and access to a robust network—while specializing in one of three in-demand tracks: Data Analytics, Cybersecurity, or AI Business Solutions.
Who can participate: Adults
Location: New York City
Website: https://www.theknowledgehouse.org/innovation_fellowship/

22. LaGuardia Community College Data Analytics Bootcamp

Description: LaGuardia Community College offers a free, six-week, full-time training program in data analytics and career readiness for low-income adults, concluding with a capstone project and the opportunity to be considered for a paid full-time apprenticeship at The Data School.
Who can participate: Job seekers who have at least a GED diploma and earn an annual income of less than $55,000
Location: Manhattan
Website: https://www.laguardia.edu/ce/career-skills-training/data-analytics-bootcamp/#about

23. The Marcy Lab School

Description: The Marcy Lab School is a 12-month, full-time, tuition-free college alternative for underrepresented young

adults, providing technical training in software engineering or data analytics, mentorship, and leadership seminars to prepare students for careers in tech.
Who can participate: 18- to 24-year-olds without a bachelor's degree
Location: Brooklyn
Website: https://www.marcylabschool.org/

24. New York Public Library: Project <code>

Description: Project <code> is a free 12-week front-end web development program. Students learn HTML, CSS, layouts, and RWD.
Who can participate: Adults
Location: Bronx, Manhattan, Staten Island
Website: https://sites.google.com/nypl.org/techconnect/programs/project-code-frontend-web-development

25. New York Public Library: TechConnect

Description: One of the largest tech training programs operating in New York City, TechConnect offers over 100 free technology classes and programs online and in New York Public Library computer labs and multimedia studio spaces for New Yorkers at every skill level.
Who can participate: Adults
Location: Bronx, Manhattan, and Staten Island
Website: https://www.nypl.org/techconnect

26. Northstar Digital Literacy

Description: The New York State Department of Labor offers free Northstar Digital Literacy training to help New Yorkers build computer skills through skill assessments and self-guided online learning.
Who can participate: Adults
Location: New York State Department of Labor Career Centers
Website: https://dol.ny.gov/digital-literacy-training-northstar

27. NPower

Description: NPower creates pathways to tech careers for military veterans, young adults facing opportunity gaps, and women seeking greater mobility by providing free tech training in areas including cloud computing, cybersecurity, IT support, and more.
Who can participate: Individuals, ages 18-26, with a high school diploma or equivalent; or military veterans and spouses over 21
Location: New York City
Website: https://www.npower.org/

28. Nucamp

Description: Nucamp is an online program with bootcamp offerings for beginners and advanced coders.
Who can participate: Adults
Location: Online
Website: https://www.nucamp.co/

29. NYC Department of Small Business Services: Access Training

Description: New York City's Department of Small Business Services (SBS) offers training programs for in-demand occupations across sectors throughout New York City. SBS uses industry research to design training programs to ensure that the skills learned are the skills employers need.
Who can participate: Adults
Location: New York City
Website: https://www.nyc.gov/site/sbs/careers/access-training.page

30. NYC Parks: Media Labs

Description: NYC Parks operates 32 media labs across the five boroughs, offering state-of-the-art digital equipment and digital literacy classes.
Who can participate: Recreation center members
Location: New York City
Website: https://www.nycgovparks.org/facilities/media-labs

31. NYC Tech Talent Pipeline

Description: Tech Talent Pipeline is a partnership between New York City and local employers that aims to broaden access to technology careers by providing free training in data analysis and web development.
Who can participate: Adults
Location: New York City
Website: https://ttp.nyc/

32. NYCHA Digital Vans

Description: NYCHA's four Digital Vans serve as mobile computer labs, providing residents with internet access, printing services, and digital training and assistance through an on-site instructor.
Who can participate: NYCHA residents
Location: New York City
Website: https://www.nyc.gov/site/nycha/residents/digital-van.page

33. Opportunities for a Better Tomorrow (OBT)

Description: Opportunities for a Better Tomorrow’s advanced tech training programs help young adults and adult learners from underserved communities build the digital and technical skills needed for today’s workforce in sectors including health care, construction, and technology.
Who can participate: Adults
Location: Brooklyn
Website: https://obtjobs.org/

34. Per Scholas

Description: Per Scholas is a workforce development program that provides no-cost technology training, career development, and job placement assistance for students looking for a competitive career in tech.
Who can participate: Adults
Location

: New York City
Website: https://perscholas.org/

35. Pursuit

Description: Pursuit is a workforce development program building pathways to new careers in tech for talented adults coming from underserved communities. Their new AI-Native Program is equipping participants the tool, skills, and opportunities to lead in AI.
Who can participate: Low-income adults
Location: Long Island City, Queens
Website: https://www.pursuit.org/

36. Queens Public Library: Technology Training

Description: Queens Public Library makes digital literacy programming accessible to residents through free in-person workshops, one-on-one "Neighborhood Tech Help" sessions, and online tutorials.
Who can participate: Queens residents
Location: Queens
Website: https://queenslibrary.org/programs-activities/technology-training

37. Queensborough Community College: Digital Green Technology Professional Training Program

Description: The Digital Green Technology Professional Training Program is preparing a skilled local workforce for the rapidly growing digital and energy infrastructure sector in the tri-state area. There is growing demand for technicians and specialists who understand advanced computing systems and energy-efficient environments. This program addresses the workforce gap by providing accessible skills training and creates pathways to those jobs.
Who can participate: Queensborough Community College students
Location: Queens
Website: https://www.qcc.cuny.edu/engtech/GreenTechAcademy/programs.html

38. The Recurse Center

Description: The Recurse Center (RC) is a free retreat for programmers to recharge and grow. It serves as an opportunity for programmers to dedicate their time to programming in a focused, supportive, and energizing environment.
Who can participate: People of all ages who have experience in programming
Location: Brooklyn
Website: https://www.recurse.com/

39. Sapna NYC

Description: Sapna provides free, linguistically accessible computer literacy training for South Asian immigrant women in New York City.
Who can participate: South Asian immigrant women
Location: Bronx
Website: https://sapnanyc.org/empowermentadvocacy/#1565784394789-c5ab05b4-cea6

40. St. Nicks Alliance: Workforce Development

Description: St. Nicks Alliance Workforce Development Program helps job seekers overcome barriers to education,

employment, and training with the skills needed to secure a high-wage job.
Who can participate: Low- and moderate-income adults
Location: Brooklyn
Website: https://stnicksalliance.org/workforce-development/

41. SUNY's Advanced Technology Training and Information Networking (ATTAIN) Labs

Description: With over a dozen locations in New York City, SUNY's ATTAIN computer labs offer free vocational tech courses, industry certifications, and one-on-one digital support to New York State residents.
Who can participate: Adults
Location: New York City
Website: https://www.sunyattain.org/

42. Union Settlement

Description: Union Settlement is an East Harlem-based social service organization offering adult education and skills training, including courses on digital literacy, Microsoft Office, QuickBooks, and more. Programs also accommodate English language learners.
Who can participate: Adults
Location: Manhattan
Website: https://www.unionsettlement.org/adult-education/

43. Year Up United

Description: Year Up United is a one-year, intensive tuition-free skills-first job training program that aims to close the opportunity divide by providing young adults with six months of skills development and coursework followed by a six-month corporate internship.
Who can participate: Adults, ages 18 to 29 years old with no bachelor's degree
Location: Financial District, Manhattan
Website: https://www.yearup.org/

Hidden Digital Skills: Training Resource Guide is a publication of the Center for an Urban Future. Researched and written by Rachel Neches, Yona Litwin, and Eli Dvorkin.

Center for an Urban Future (CUF) is a leading think tank focused on building a stronger and more equitable economy in New York City, and expanding economic opportunity for all New Yorkers.

This resource guide was made possible by support from **Verizon**. General operating support for the Center for an Urban Future has been provided by **The Clark Foundation**, **Robin Hood**, and the **Altman Foundation**.
