Stark Disparities in Employment and Wages for Black New Yorkers

The growing mass movement for racial justice has shined a light on harsh disparities affecting nearly every facet of American life—from criminal justice and policing to the health and economic effects of the pandemic. This new analysis examines disparities in employment and wages experienced by Black residents of New York City, finding widespread underrepresentation and alarming wage gaps across dozens of industries.

by Jonathan Bowles, Eli Dvorkin, and Charles Shaviro

In recent weeks, the growing mass movement for racial justice has shined a light on harsh disparities affecting nearly every facet of American life—from criminal justice and policing to the health and economic effects of the pandemic. This new analysis examines disparities in employment and wages experienced by Black residents of New York City, finding widespread underrepresentation across dozens of industries and alarming wage gaps.

This analysis shows that Black New Yorkers hold a shockingly small share of the jobs in a wide array of well-paying industries—not just in finance and technology, but also in creative fields, construction, manufacturing, and business services.

Black New Yorkers account for just 7 percent of the workforce in advertising, 7 percent in the securities industry, 8 percent in publishing, 9 percent in computer systems design (the largest field within the tech sector), 9 percent in motion pictures and video, 13 percent in legal services, and 16 percent in construction, even though Black New Yorkers make up 21 percent of the overall workforce and 22 percent of the city's population.

Black New Yorkers are also underrepresented in many industries with a significant number of accessible, middle-wage jobs, comprising just 10 percent of all workers in dental offices, 12 percent in doctor's offices, and 14 percent in food manufacturing, among others.

In addition to these workforce disparities, this analysis finds significant income disparities between Black and white workers in nearly every industry—not just high-paying fields. For example, the median annual income for Black New Yorkers employed in the city's department stores is barely one-third of that of their white counterparts (\$15,870 vs \$44,674). Black postal workers earn \$41,261, compared to \$59,277 earned by white colleagues. There are similarly large pay disparities between

Black and white New Yorkers in the warehousing and storage industry (\$25,616 vs \$47,080), sporting goods stores (\$18,443 vs \$32,000), beauty salons (\$10,474 vs \$25,000), newspaper publishing (\$30,500 vs \$79,348), the film & tv sector (\$29,321 vs \$61,478), banking (\$52,899 vs \$123,370) and dozens of other industries.¹

Black New Yorkers Are Underrepresented in Dozens of High- and Middle-Wage Industries

■ Black (%) Share of Workforce

Black New Yorkers Earn Less Than White New Yorkers in Most Industries

Source: CUF analysis of 2018 American Community Survey 5-Year Estimates

Indeed, Black workers earned more than their white counterparts in just 12 of the nearly 140 industries we analyzed for this report—and all but four pay less than \$39,000 annually. In 33 other industries, the gap in median incomes for Black and white workers was less than \$10,000. In the remaining 92 industries, the income gap was greater than \$10,000. Often, industries that typically produce middle-wage jobs for white New Yorkers pay near-poverty wages to Black New Yorkers.

The factors that produce these disparities are complex and pervasive, likely including persistent gaps in educational attainment by race and income—magnified by the effect of systemic racism. No matter the scale of the challenge, closing these gaps should be among the city's highest policy priorities and will require a dedicated and long-term response. For the city's economy not only to recover from the current crisis, but to reemerge more equitable and inclusive, policymakers will need to take strong steps to help more Black New Yorkers gain footholds—and advance—in a diverse range of well-paying and accessible fields. This should include major new efforts to help more Black New Yorkers earn a postsecondary credential, access high-quality job training, or start and grow a business. At the same time, industry leaders will need to develop and expand evidence-based strategies and partnerships to ensure that Black New Yorkers can participate and thrive in the city's eventual economic rebound.

Black New Yorkers are significantly underrepresented in many of the city's high- and middle-wage industries

Our analysis shows that Black New Yorkers make up a strikingly small share of the workforce in many of the city's high- and middle-wage industries. This includes the finance and tech sectors, but also many of the city's creative industries, offices of physicians and dentists, and even the more accessible manufacturing sector.

The following data shows the Black share of the workforce in a number of higher-wage and middle-wage sectors, broken down by industry category:

Creative Industries

- 7% in advertising, public relations, and related services

- 8% in the periodical, book, and directory publishers sector
- 8% in architectural, engineering, and related services
- 9% in motion pictures and video industries

Technology

- 6% in scientific research and development services
- 7% at software publishers²
- 9% in computer systems design (which makes up the largest share of workers in the city's tech sector)
- 9% of Internet publishing and broadcasting and web search portals
- 11% in data processing, hosting, and related services.
- 12% of electronic shopping and mail order houses (which includes most e-commerce companies)

Finance and Insurance

- 7% in securities, commodities, funds, trusts, and other financial investments, the highest-earning financial sector
- 9% percent in the nondepository credit and related activities sector
- 13% in banking and related activities

Medical & Dental Offices

- 10% in offices of dentists
- 12% at offices of physicians
- 6% at offices of other health practitioners

Business Services

- 8% in management, scientific, and technical consulting services
- 12% in accounting, tax preparation, bookkeeping, and payroll services
- 13% in legal services

Manufacturing

- 7% in apparel manufacturing
- 14% in food manufacturing
- 15% in the printing sector
- 15% in pharmaceutical and medicine manufacturing

There is a strikingly large income gap between Black and white workers in nearly every industry

Our analysis reveals a significant disparity in the median salary for Black and white workers in most industries. This includes high-wage fields like finance and tech. But more surprisingly, it includes other sectors like retail, warehousing, personal services, and even the postal service.

The following is a small sampling of the industries where median annual income is significantly lower for Black workers

compared to white workers:

Retail

- Department stores – \$15,870 for Black workers vs \$44,674 for white workers
- Sporting goods stores – \$18,443 vs \$32,000
- Furniture and home furnishings stores – \$20,000 vs \$52,000
- Automotive parts, accessories, and tire stores – \$12,568 vs \$31,755
- Clothing stores – \$20,000 vs \$52,899
- Electronics stores – \$25,137 vs \$52,926
- Pharmacies and drug stores – \$20,102 vs \$40,000
- Beauty salons – \$10,474 vs \$25,000

Transportation & Warehousing

- Warehousing and storage – \$25,616 vs \$47,080
- Water transportation – \$24,000 vs \$36,658
- Bus service and urban transit – \$52,369 vs \$68,769
- Air transportation – \$31,421 vs \$65,628
- Postal Service – \$41,261 vs \$59,277

Finance, Tech, Creative & Professional Services

- Legal services – \$53,984 vs \$101,000
- Banking and related activities – \$52,899 vs \$123,370
- Securities, commodities, funds, trusts, and other financial investments – \$70,885 vs \$137,606
- Motion pictures & video industries – \$29,321 vs \$61,478
- Advertising, public relations, and related services – \$63,479 vs \$81,971
- Newspaper publishers – \$30,500 vs \$79,348
- Accounting, tax preparation, bookkeeping, and payroll services – \$47,633 vs \$69,675
- Electronic shopping and mail-order houses – \$35,000 vs \$68,769
- Real estate property managers, offices of real estate appraisers, and other activities related to real estate – \$40,985 vs \$58,000

In some industries, Black New Yorkers comprise a more representative share of the workforce

There are a number of industries where Black workers make up a disproportionately large share of the workforce or generally reflect their overall share (21 percent). For instance, the following data shows the Black share of the workforce in industries including:

- Nursing care facilities – 58% of the workforce
- Community food and housing, and emergency services – 49%

- Investigation and security services – 48%
- Rail transportation – 47%
- Bus service and urban transit – 45%
- Administration of human resource programs – 44%
- Couriers and messengers – 39%
- Home health care services – 38%
- Postal services – 38%
- Psychiatric and substance abuse hospitals – 37%
- Public finance activities – 36%
- Justice, public order, and safety activities – 35%
- Department stores – 34%
- General medical and surgical hospitals, and specialty (except psychiatric and substance abuse) hospitals – 33%
- Individual and family services – 32%
- Air Transportation – 32%
- Savings institutions, including credit unions – 31%
- Child day care services – 30%
- Truck transportation – 27%
- Museums, art galleries, historical sites, and similar institutions – 22%
- Insurance carriers – 21%
- Elementary and secondary schools – 21%
- Automobile dealers – 20%
- Traveler accommodation – 19%
- Book stores & news dealers – 18%

Source: CUF analysis of 2018 American Community Survey 5-Year Estimates

A small number of industries show little or no pay disparities

In 12 of the nearly 140 industries we analyzed for this report, Black workers had a higher median annual income than white workers. And in 33 other industries, the gap in median annual incomes for Black and white workers was less than \$10,000. The following are examples of industries with little or no differences in median annual income between Black and white workers:

- Child day care services – \$19,044 for Black workers vs \$18,853 for white workers
- Convenience stores – \$23,181 vs \$15,878
- Drycleaning and laundry services – \$26,463 vs \$20,493
- Nail salons and other personal care services – \$10,246 vs \$10,580
- Barber shops – \$21,170 vs \$13,381
- Nursing care – \$35,657 vs \$40,000
- Truck transportation – \$30,739 vs \$35,862
- Automotive repair and maintenance – \$31,739 vs \$35,000
- Taxi and limousine service – \$18,443 vs \$18,524
- Business support services - \$26,449 vs \$31,421
- Construction – \$43,035 vs \$52,369
- Supermarkets and other grocery stores – \$18,736 vs \$21,160

Understanding the gaps in workforce representation and income

This data brief is intended to shed light on the scope and scale of the disparities affecting Black New Yorkers in the city's workforce. It does not include an in-depth analysis of their causes and contributing factors, which are complex and interconnected with issues of racism, poverty, and other socioeconomic conditions.

However, data suggests that at least some of these disparities are linked to significant gaps in postsecondary educational attainment. In many higher-paying industries, the lion's share of job and wage growth has gone to workers with four-year college or graduate degrees. For industries with steep educational and licensing requirements—like architecture, engineering, and medicine—workers with those credentials will understandably earn more than those without them. As a result, the alarmingly low share of Black New Yorkers with those credentials likely contributes to both hiring and wage disparities. For instance, while 68.6 percent of white New Yorkers in the labor force have obtained a bachelor's degree or higher level of education, the same is true for just 30.7 percent of Black New Yorkers.

But gaps in educational attainment alone can't fully account for these enormous disparities. Research suggests that other forces are also at play, including hiring practices that disadvantage Black candidates, unequal access to peer networks and mentorship, the harmful effects of poverty, and the impact of systemic racism. Advancing racial justice in employment and wages will require policies that tackle all of these interconnected factors.

Although more research is needed to unpack these complex challenges and develop a full range of solutions, there are several important steps that policymakers and industry leaders can take in the near term to help narrow these disparities. These include:

- Strengthening and expanding programs that can help more Black New Yorkers to enroll and succeed in postsecondary education, including the evidence-backed CUNY ASAP initiative.
- Scaling up skills-building pathways that have demonstrated success in helping to diversify growing industries, such as high-quality training for tech careers and apprenticeship programs that include—but extend beyond—the building trades.
- Investing in work-based learning opportunities, including paid internships and career exploration initiatives.

- Recruiting industry leaders across sectors—from finance and healthcare to tech and the creative economy to retail and manufacturing—to audit and improve internal policies and practices and partner with education and training providers to design credentials, build programs, and broaden pipelines.

The Center for an Urban Future is continuing to analyze the pervasive racial disparities in employment that harm Black New Yorkers and undermine New York City's pursuit of a more inclusive economy. Future research will dig deeper into the specific causes and effects of these disparities and tackle multiple ways that policymakers and industry leaders can help to close these gaps.

Methodology

In this brief, we analyze data from the U.S. Census Bureau 2018 American Community Survey 5-Year sample. We use the total pre-tax wage and salary income earned by New York residents employed in the different four-digit industries laid out in the Census's current industrial classification system, for which there was a large enough sample for our findings to be worth noting (we analyzed the four-digit industries that have at least 400 Black workers). While we found evidence of similar disparities in representation and wages for other racial and ethnic groups, which will be addressed in future reports, this report focuses on the specific disparities affecting Black New Yorkers.

Notes

1. Software publishing employed just 214 Black New Yorkers in 2018, which is below this report's 400-employee cutoff (see methodology above). However, these workers are part of a sufficiently large sample to be of note.

2. Disparities are calculated based on median annual wages from employment for workers in each industry.
